

## European Federation of Societies for Ultrasound in Medicine and Biology

### JOURNAL CLUB

The EFSUMB Publications Committee is setting up a Journal Club with voluntary ultrasound experts comprising all areas of medical ultrasonography. Each of the Journal Club members may screen a defined list of Ultrasound journals with an Impact Factor plus emerging journals for recently published interesting articles. The experts are expected

to select and briefly highlight articles giving valuable insights in the field of medical ultrasound to the European Ultrasound Community. We are planning 4 Issues per year, which will be published quarterly in an online newsletter. The contributors will be listed and a Table of Contents displayed with links to the papers reviewed will be provided. The aim is

to show the abstract of the selected article expanded with a short personal opinion focused on strengths and weaknesses of each publication.

If you are interested in volunteering please contact [admin@efsumb.org](mailto:admin@efsumb.org)
