

EUROSON-School

Refresher and CEUS Course

16. – 19. October 2014, University Hospital Košice

Since 2007 we organize courses in Kosice with live demonstrations of CEUS - this amazing method, which is in many cases better than CT and MRI, but without radiation exposure, without danger of a acute renal failure or other side effects. A correct application allows us quick and clear diagnostics and also clearly lowering costs, which in this time of tight budgets, especially important. Top people in Europe now meet in Kosice, to discuss this exiting method, share experiences, will show case reports and will definitely make each of you enthusiastic about this method.
