ERRATUM

The authors have brought to publisher's attention that ►**Tables 1** and **2** have been set incorrectly in the above article (DOI: 10.1055/s-0040-1714936) published in the *Journal of Health and Allied Sciences NU* (10(2):79–85). The correct tables appear as follows.

Table 1 Estimation of LC₅₀ for aqueous extract

Concentration (ppm) N = 30	Dose difference (a)	Mean death (b)	(a) × (b)
4,000	–	–	–
3,500	500	9.5	4,750
3,000	500	8	4,000
2,500	500	6	3,000
2,000	500	4.5	2,250
1,500	500	2.5	1,250
1,000	500	0.5	250
Total			15,500

Note: LC₅₀ = Maximum dose – ($\sum ab$ /no. of embryos used) = 4000 – (15500/10) = 2450 ppm.

Table 2 Estimation of LC₅₀ for ethanol extract

Concentration (ppm) N = 30	Dose difference (a)	Mean death (b)	(a) × (b)
12	–	–	–
11	1	8	8
10	1	5	5
9	1	3.5	3.5
7	2	2.5	5
Total			21.5

Note: LC₅₀ = Maximum dose – ($\sum ab$ / no. of embryos used) = 12 – (21.5/10) = 9.85 ppm.
