Int Arch Otorhinolaryngol 2023;27(4):e547–e548.

It is with great satisfaction that we announce that according to the 2022 Journal Citation Reports (JCR), the International Archives of Otorhinolaryngology (IAO) has achieved its first Impact Factor: 1.1. This achievement represents a significant milestone in our journey and reinforces IAO's remarkable contributions in the field of otolaryngology, as well as its global recognition among researchers and academics. We are excited to share this news with our community of readers, authors, and reviewers (► **Fig. 1**).

The Impact Factor is a metric calculated by Clarivate, which reflects the annual average of citations received by articles published in the past 2 years in journals indexed by the Web of Science¹ (► **Fig. 2**). It serves as an indication of the journal's influence and relevance in the scientific community.

IAO is an official publication of the Otorhinolaryngology Foundation, edited by Thieme and launched in 1997. It is an open access journal, with no costs of processing articles.^{2,3} Since 2020, IAO has been indexed in the Web of Science and focuses on the study and research of disorders related to the ear, nose, mouth, pharynx, larynx, cervical region, upper airway system, audiology, and communication disorders.⁴

IAO is an international peer-reviewed journal covering the full spectrum of otolaryngology, from prevention to diagnosis, treatment, and rehabilitation. It acts as an essential reference for experts in the field and is also a valuable tool for students in search of the latest information.

IAO's first Impact Factor is an indicator of its success in promoting and disseminating scientific knowledge. It repre-

Calculation

Journal Impact Factor™ is calculated using the following metrics:

$$\frac{\text{Citations in 2022 to items published in 2020 (175) + 2021 (77)}}{\text{Number of citable items in 2020 (105) + 2021 (120)}} = \frac{252}{225} = 1.1$$

Fig. 2 Calculation of the IAO Impact Factor. Source: Journal Citation Reports™.

sents the recognition of the scientific community regarding the quality and relevance of the articles published in the journal. The first IAO Impact Factor is undoubtedly a cause for celebration, but also an ongoing incentive to maintain the high standards of excellence and scientific rigor that made it possible.
