

Book Review

A collection of Ear, Nose and Throat studies which has been sent to us for review, is a commemorative publication celebrating the Tenth Anniversary of Dr. Ryo Takahashi as Professor and Director of Department of Oto Rhino Layngology at Jihci University School of Medicine, Tokyo.

It embodies a collection of contributions on Scientific researches and clinical investigations carried out by members of the department over a period of more than ten years.

There is much in these collections, which are of immediate interest to the Plastic and Reconstructive Surgeons. There is a separate chapter on 'Plastic and Reconstructive Surgery' and contains ten articles of varying topics.

As a good reference volume it is strongly recommended and should find a place in every department library of Plastic Surgery.
